Karachi, Pakistan

SUMMARY

Software engineer focused on building reliable, scalable web applications and practical AI-powered solutions. Experienced in working across frontend and backend development, translating requirements into maintainable software, and contributing effectively in remote team environments. Committed to clean architecture, continuous learning, and delivering polished, production-ready solutions.

EXPERIENCE

Software Engineer Intern 10/2025 - 01/2026

Vertex9 Systems

Worked remotely as a Software Engineer Intern for a three-month engagement, contributing to software development tasks and web application features. Collaborated on frontend and backend implementation, API-focused development, and practical engineering work while following modern development practices and project requirements.
